| Energy | |
|---|---------------|
| Rating | A B C D E F G |
| Potential Rating | A B C D E F G |
| Country | |
| Ease of starting a business | Average |
| Ease of dealing with construction permits | Average |
| Ease of getting electricity | Average |
| Ease of registering property | Average |
| Ease of getting credit | Below Average |
| Strength of minority investors protection | Average |
| Ease of paying taxes | Below Average |
| Ease of trading across borders | Average |
| Ease of enforcing contracts | Average |
| Ease of resolving insolvency | Average |

- ⇒ ENERFUND combines data open to the public, providing access by use of GIS.
- ⇒ Energy Performance Certificates provide building data displayed in the tool.
- ⇒ The tool assists in identifying areas with potential to increase energy efficiency.
- ⇒ It does not substitute detailed analysis but helps to identify areas where it is worth investigating in more detail.

ENERFUND has received funding from the European Union's Horizon 2020 programme under Grant Agreement No 695873 | Contact: info@enerfund.eu | <http://enerfund.eu/>
